

AAA Coinvest Fund A LP

FY2025 · Draft 1.1 · Cayman Islands · Closed-end PE LP

Preparer export · Build 2026-05-17

Readiness: RED

3 CRITICAL unresolved · 7 HIGH unresolved

Cover

1 finding

Entity identity, period, presentation header. Qualitative mismatches are ALWAYS CRITICAL regardless of dollar impact.

F-001 CRITICAL/CERTAIN OPEN

Cover page · p. 1 · Domicile statement

Cover page lists domicile as Delaware. Fund metadata records domicile as Cayman Islands. Qualitative materiality applies — this is CRITICAL regardless of dollar impact.

Fix: Confirm correct domicile with fund formation documents; correct the cover page (and any internal references) before issuance.

Statement of Assets and Liabilities

1 finding

Balance-sheet equivalent. Tie-out to Schedule of Investments mandatory.

F-002 HIGH/CERTAIN OPEN

Investments at fair value · p. 3 · Investments at fair value

The Statement of Assets and Liabilities omits the parallel cost column for investments. ASC 946-210-45-1 requires both cost and fair value when the fund holds investments measured at fair value.

Citation: ASC 946-210-45-1

Fix: Add a 'Cost' column adjacent to 'Fair value' for investments, with the corresponding aggregate cost figure tied to the Schedule of Investments.

Statement of Operations

1 finding

Net change must tie to Statement of Changes.

F-003 HIGH/CERTAIN OPEN

Realized and unrealized gain/loss · p. 4 · Net realized and unrealized gain/loss

Realized vs unrealized gain/loss on investments is combined into a single line (\$142.3M). Bifurcation is required and available — split into Realized \$61.2M and Unrealized \$81.1M.

Citation: ASC 946-220-45-3

Fix: Bifurcate the combined line on the face of the Statement of Operations: 'Net realized gain (loss) on investments' and 'Net change in unrealized appreciation (depreciation) on investments' shown separately.

Schedule of Investments

2 findings

>5% of net assets MUST be disclosed by name per ASC 946-210-50-6.

F-011 CRITICAL/PROBABLE OPEN

Level 3 designation · p. 13 · Project Titan Holdings

Hidden workbook row at SOI!47 classifies Project Titan Holdings as Level 2. Visible row at SOI!46 (same investment) shows Level 3. The published FS shows Level 3. The hidden row may indicate either a working-paper override or an unresolved valuation question.

Fix: Resolve the Level classification with the valuation committee. Document the rationale in the VPM file. Hide the inactive row OR delete the row to remove the contradiction signal.

F-005 HIGH/CERTAIN ACCEPTED

Concentration · p. 12 · Other private equity investments (aggregated)

The Schedule of Investments aggregates \$158M (6.3% of NAV) under 'Other private equity investments' without name-level disclosure. ASC 946-210-50-6 requires name-level disclosure of any investment >5% of net assets.

Citation: ASC 946-210-50-6

Fix: Break out the constituent investments within the aggregated line by name; verify any single name >5% of NAV is separately disclosed.

Disclosure infrastructure. Significant accounting policies through subsequent events.

F-013 HIGH/CERTAIN OPEN

Significant accounting policies · Note 2 · p. 15

The Significant Accounting Policies note references 'the Fund's investments in AAA Coinvest Fund III portfolio companies' — AAA Coinvest Fund III is a different vehicle. This appears to be carried-over language from a prior draft of a different fund's FS.

Fix: Replace 'AAA Coinvest Fund III' with the correct entity name ('AAA Coinvest Fund A LP' or 'the Fund'). Scan the entire note set for additional cross-fund residue.

F-004 CRITICAL/CERTAIN OPEN

Fair value measurements · Note 4(b) · p. 17

The Level 3 reconciliation roll-forward in Note 4(b) presents opening balance, purchases, and ending balance. ASC 820-10-50-2(c) requires opening balance, purchases, sales, settlements, issuances, transfers in/out, realized gain/loss, unrealized gain/loss, and ending balance. The still-held subset of realized/unrealized per -2(d) is also absent.

Citation: ASC 820-10-50-2c

Fix: Expand the Level 3 roll-forward to include all eight required movement columns and the still-held subset disclosure. Verify the resulting ending balance ties to the Schedule of Investments Level 3 subtotal (\$412.4M).

F-006 MEDIUM/CERTAIN OPEN

Organization · Note 1 · p. 14

The Organization note does not reference Cayman Private Funds Act registration. The Fund is a Cayman exempted limited partnership formed post-2020 — PFA registration disclosure is the standard expectation.

Citation: CIMA:PFA

Fix: Add a sentence to the Organization note: 'The Fund is registered with the Cayman Islands Monetary Authority under the Private Funds Act (registration number [X]).' Verify the registration number from formation documents.

F-007 HIGH/PROBABLE OPEN

Related party transactions · Note 8 · p. 22

The Related Party Transactions note discloses the General Partner and Investment Manager relationships but does not disclose the Fund's relationship to AAA Portfolio Operations LLC, which is named in the Schedule of Investments as the operating-services counterparty for two portfolio companies. The auditor will likely push back on this.

Fix: Confirm whether AAA Portfolio Operations LLC is an affiliate of the GP/Manager. If yes, expand Note 8 to disclose: nature of relationship, terms of services, period amount, and balance receivable/payable at period end.

F-008 HIGH/PROBABLE OPEN

Income taxes · Note 9 · p. 25

The Income Taxes note states the Fund has no uncertain tax positions. The Schedule of Investments shows non-US corporate investments. The note does not address PFIC treatment for US investors. If any non-US corporate investment qualifies as a PFIC, the disclosure regime under IRC §1297–1298 applies.

Citation: IRS:PFIC

Fix: Confirm with tax counsel which non-US corporate investments qualify as PFICs. Add disclosure covering: (a) presence of PFIC investments, (b) treatment (mark-to-market under §1296 / QEF under §1295 / default §1291), (c) whether elections have been made on investors' behalf.

F-009 MEDIUM/PROBABLE OPEN

Recently issued accounting standards · Note 13 · p. 30

The 'Recently issued accounting standards' note mentions ASU 2022-03 but does not address ASU 2023-09 (income tax disclosures, effective FY 2025+) — which may be applicable if the Fund has taxable blocker subsidiaries.

Citation: ASC 105-10-65

Fix: Confirm with tax team whether ASU 2023-09 applies (taxable blocker subsidiaries with rate reconciliation). If applicable, add the ASU 2023-09 effective-date and expected-effect disclosure to Note 13.

F-010 MEDIUM/CERTAIN OPEN

Subsequent events · Note 14 · p. 31

The Subsequent Events note states events were evaluated through April 15, 2026. The draft is dated May 17, 2026 — the evaluation date precedes the draft date by over a month. Either the evaluation date is stale or the draft date is pre-dated.

Citation: ASC 855-10-50-4

Fix: Update the subsequent-events evaluation date to the expected issuance date. Re-evaluate events occurring between the prior date and the new date.

Financial Highlights

1 finding

ASC 946-205-50 ratios. Per-class breakouts when capital structure differs.

F-016 LOW/CERTAIN OPEN

Per-class ratios · p. 33 · Expense ratio

Financial Highlights expense ratio for Class A is presented as 1.85 with no percent sign. All other ratios on the same page use percentage notation. Cosmetic inconsistency.

Fix: Add the percent sign to the Class A expense ratio for typographic consistency.

Cross-Statement

1 finding

Findings spanning multiple statements that cannot be cleanly localized.

F-012 HIGH/CERTAIN OPEN

Carried interest reconciliation · Carried interest accrual

AAA Coinvest Fund A LP records carried interest accrual of \$34.2M on the Statement of Changes. The sibling AIV vehicle (AAA Coinvest Fund A AIV LP) FS records zero carried interest accrual. Per the LPA, the AIV applies a parallel waterfall — a proportional accrual is expected.

Fix: Reconcile the carried interest accrual between Fund A and Fund A AIV. Either correct one of them or document the timing/policy reason for the difference in both sets of FS.
